Akash Bhalshankar

AI Engineer
Hyderabad, Telangana, India 500016 | +91 9014160774 | akashbhalshankar07@gmail.com | LinkedIn | GitHub

Summary

AI Engineer with 1.8+ years of experience building LLM agent pipelines and backend services. Skilled in LangChain/LangGraph orchestration, RAG, and FastAPI, with hands-on work integrating Azure OpenAI and human-in-the-loop approval workflows into live production systems. Built NavLearn, a test-automation agent that cut manual effort by 30–40%, and independently developed AgriMentor, an AI-powered farming assistant, end-to-end.

Technical Skills

AI / LLM: LLM, LangChain, LangGraph, RAG, FAISS, Azure OpenAI, Azure AI Foundry
Programming: Python, Java | **Frameworks**: FastAPI, Pydantic | **Databases**: MySQL, SQLite, SQL
Cloud: Azure OpenAI Service, Azure Blob Storage, Azure Container Apps, Microsoft Entra ID, Microsoft Graph
Tools: Git, GitHub Copilot, Selenium | **Methodologies**: Agile, Scrum

Professional Experience

Trainee AI Engineer Oct 2025 – Present
UBS *Hyderabad, India*

Project 1: Request Management Service – Application Onboarding

- Worked as part of the Application Onboarding Team and delivered 5–7 enterprise applications onto a LangGraph-based multi-agent foundation, integrating a reflection agent that automatically reviews outputs and proceeds through the workflow without manual intervention.
- Built onboarding logic that generates SQL commands as part of the agent output, streamlining data setup for each newly onboarded application.
- Integrated a Microsoft Teams bot for human-in-the-loop approval, routing AI-generated responses to reviewers before final action.
- Deployed and maintained the Request Management Service application in a live environment.
- Received positive recognition from the business team for the quality and reliability of onboarded applications.

Project 2: Provisioning Accelerator

- Contributed the authentication module, implementing secure sign-in using Microsoft Entra ID and Microsoft Graph API for identity verification.
- Developed file-handling logic to generate and manage files as part of the provisioning workflow.

Project 3: Vibe Testing

- Testing internal web applications by translating BDD specifications into runnable test spec files using GitHub Copilot.
- Validating AI-generated test scripts against application behavior to ensure accurate coverage and reduce manual test-authoring effort.
- Created NavLearn, a skill-file agent that writes test scripts using a nav-registry and action-registry, cutting manual test-authoring effort by 30–40% after rollout.
- Collaborated with QA and engineering teams to integrate NavLearn into the existing Vibe Testing pipeline.

Bootcamp Project: AgriMentor – AI-Powered Farming Assistant

- Built an AI-powered web app that gives first-time farmers personalized crop and soil recommendations for Indian conditions.
- Developed backend APIs with FastAPI to process soil test inputs (PDF/image/text) and return crop recommendations.
- Designed a crop management assistant covering watering schedules, fertilizer timelines, and pest/disease guidance.

QA Intern Mar 2025 – Oct 2025
MassMutual *Hyderabad, India*

Project: Investment Delivery Services

- Performed ETL testing using Informatica and Microsoft SQL Server, validating data consistency between on-prem and cloud environments.
- Automated regression scenarios using Selenium and raised defects in JIRA within a Kanban-based Agile setup.

Project: Eagle Version Release (EVR)

- Performed functional and regression testing based on business requirements, ensuring functionalities met expected outcomes.

Personal Projects

Chikki – Voice-First AI Career Assistant | *React, FastAPI, WebSockets, Langfuse*

- Built a voice-first AI portfolio assistant using React, FastAPI, and WebSockets, with browser speech recognition and Edge-TTS voice responses.
- Implemented ordered multi-model fallback (Groq, Gemini, NVIDIA, OpenRouter) and Langfuse observability for reliable, production-grade AI conversations.
- Designed a Google Drive-to-ATS resume pipeline that generates recruiter-tailored PDF resumes based on conversation context.

Education

Kamala Institute of Technology and Science, Karimnagar – B.Tech, Computer Science and Engineering (75%) 2024

SR Junior College, Adilabad – Intermediate (MPC) (91%) 2020

Certifications & Leadership

Certifications: Microsoft Certified: Azure AI Fundamentals (AI-900) | Microsoft Certified: Azure Fundamentals (AZ-900)
National Cadet Corps (NCC): Earned 'B' and 'C' certificates; led a group of 60 members during an NCC camp.
